Circle Health Occupational Medicine Service COVID-19 Update

May 22, 2020

Dear Occupational Medicine Client,

On May 18th, Governor Baker rolled out phased approach to the reopening of the Massachusetts economy. Phase 1 allows for some companies to reopen while still practicing the mandated restrictions of social distancing, masking, and proper hand hygiene. The state’s Department of Public Health is currently monitoring health metrics to determine how long each phase should last.

On May 25th the state plans to roll phase 2, which will give even more businesses the opportunity to safely reopen. We understand that as an employer you may have a lot of questions, such as how do I keep my employees safe? Our staff in Occupational Medicine is here to help!

We have developed new service offerings to help all our clients comply with the Mandatory Safety Standards for Workplaces. These services include return to work exams, COVID-19 testing, respirator fit testing, as well as training opportunities and wellness education for your staff. Attached please find a brochure that provides a brief description of these services. We are also available for on-site appointments at your facility, or we can work up a custom plan based on the individual needs of your organization.

To learn more about the Governor’s phased opening plan and business guidance resources, visit https://www.mass.gov/info-details/reopening-massachusetts#general-business-guidance-

Sincerely,

Circle Health Urgent Care and Occupational Medicine Department
